

CLAIM AMENDMENTS

1.(Currently Amended) A package of rolls obtained by a wrapping machine, the package consisting of including:

a group of rolls composed of at least three vertical layers of rolls, each layer composed on a plurality of rows of rolls, each layer situated one over another;

a sheet wrapped in tubular form around the group of rolls for wrapping the group of rolls, ~~with the~~ longitudinal edges of said sheet overlapped and heat-welded, and ~~with the~~ wings of each head of the sheet being folded against the rolls and ~~then~~ stabilized by heat-welding.

2.(Currently Amended) The A package according to claim 1, wherein each layer is composed of at least one row of rolls.

3.(Currently Amended) The A package according to claim 2, wherein each row of rolls includes at least one roll.

4.(Currently Amended) The A package according to claim 1, wherein said rolls in each layer are arranged horizontally.

5.(Currently Amended) The A package according to claim 1, wherein each of said rolls in each layer is press-squashed along vertical planes, parallel to ~~the relative a~~ longitudinal axis, and is arranged horizontally.

6.(Cancelled)

7.(Withdrawn) A method for obtaining a package of rolls by a wrapping machine, the method including:

forming of a group of rolls composed of at least three layers of rolls, situated one

over another;

wrapping of said group of rolls within a heat-weldable sheet in tubular form, with the relative longitudinal edges of the

sheet being overlapped;

inward folding of the vertical wings of the heads of the sheet against the rolls;

heat-welding of said longitudinal edges performed in time relation with said folding, inward folding of the horizontal wings of said heads, so as to make the latter match with the previous, already folded, vertical wings, performed in time relation with the edges heat-welding;

stabilization of the folded wings of said heads by heat-welding.

8.(Withdrawn) A method according to claim 7, wherein said rolls are arranged horizontally.

9.(Withdrawn) A method according to claim 7, wherein each of said rolls is press-squashed along vertical planes, parallel to the relative axis, and is arranged horizontally.

10.(Withdrawn) A method according to claim 7, wherein said rolls are arranged vertically.
